

## Hot weather procedures

### Uniforms

Students have a summer uniform, worn in Terms 1 and 4, and a winter uniform, worn in Terms 2 and 3. The summer uniform is designed to keep students cool. When the temperature is forecast to exceed 25 degrees in Terms 2 and 3, students may choose to wear their summer uniform on that day.

### Hydration

The school has bubblers and water bottle refill stations. Students are encouraged to bring water bottles to school on hot days. Teachers will manage student hydration during lessons. This may include allowing students to drink water from their water bottles in class.

### Sun exposure and vigorous activity

On hot days, teachers will use their discretion to discourage students from prolonged exposure to the sun. Students are encouraged to wear sunscreen, the school hat and sunglasses on hot days. Teachers may also advise students not to be involved in active outdoor games on hot days.

### Air-conditioning

On hot days, the Heads of Junior and Secondary Schools may re-room lessons to provide greater access to air-conditioned rooms.

### Changes to the school day

The school will not be closed, nor will students be sent home, in the event of hot weather.
